

Bollar.Money

A Stablecoin solution on Babylon

Bollar is created by  **BifiPal**

and powered by  **Babylon**

Bollar.Money is ...

Bollar - Bitcoin dollar, inspired by bitcoin, following the principle of bitcoin, combined with economic model of PoS chain, targeting deployment on Babylon chain.

Bollar is stablecoin, issued and managed by Bollar protocol. Bollar pegs with USD, the total issuance of Bollar depends on the value of staked BTC and LST, the dollar value of Bollar is 50% of staked token value (e.g. BTC), after issuance of Bollar, Battered stored in Bollar vault.

Bollar vault is also a capital pool. Bollar vault enables Bollar to be accessed by

1. Lender who deposit BTC/LST to mint Bollar
2. Borrower who borrow Bollar through over-collateralised asset
3. Though "Intent Contract", after received fund from lender the borrower is able to buy and sell derivatives and RWA tokens
4. Bollar enables to interests-carrying as its native yield, which can be traded in the future

A collection of Bitcoin and Litecoin coins is scattered on a dark, textured background. The coins are in various orientations, some showing the Bitcoin logo and others the Litecoin logo. The text "and community incentives" is overlaid in the center in a bold, white, sans-serif font. In the corners of the image, there are faint, stylized UI elements: a double arrow icon in the top-left, a close 'x' icon in the top-right, a close 'x' icon in the bottom-left, and a double arrow icon in the bottom-right.

and community incentives

Thank you
